Fence

Alain Berteau

Fence is a technical achievement resulting in a collection of a chair and a table.

One identical profile, 4 narrow cuts for the legs, 4 large cuts for the seat. The chairs and tables are linkable and stackable.

Indoor and outdoor versions are available: The indoor version is in beech wood with beech or oak veneer, the outdoor version is in robinia wood with teak veneer. Natural wood, stained, varnished and lacquered versions.

The collection is delivered in triangular boxes and easy to assemble with just 8 screws for the chair, and 28 screws for the table.
