Shift

Alain Berteau

Shift is a complete new system of consoles, desks, shelves and tables.

Merging cabinetmaking and ultramodern digital cutting with long-lasting materials resulted in a unprecedented collection, answering to all home and office needs. A multitude of applications. Each structure profile of the different items of the Shift collection include convenient hidden drawers and the structural beam can be used for cable management.

The whole system is made out of thick massive laminate panel, and will soon also be available in oak veneered plywood. This massive laminate is composed out of compressed papers in resins, and is hard like stone. The natural colour is a warm, cloudy brown. The drawers are in metal.

The collection comes in unfinished, varnished and lacquered versions.

The furniture is packed in flat pack and is easily assembled in no time with screws and one identical profile.

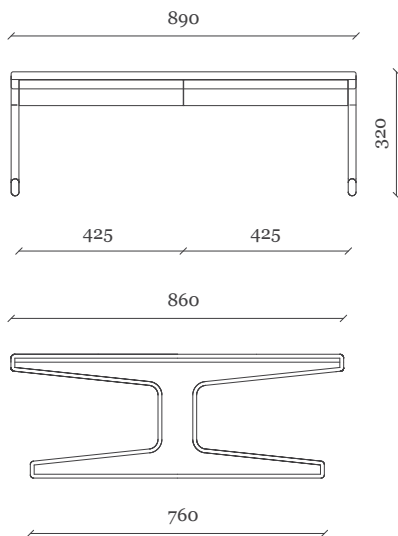

--

Low Table (4 drawers)

Use: Indoor
