Smoke

Stefan Schöning

The Smoke chair is a modern version of a classical typology, the bergere chair which is well known for smoking cigars, reading a book, etc.

A lounge version that has been stretched and lowered. The ears have been cut-off, but the back is still high enough to rest your head.

Smoke has been developed for and presented at the new pavilion of the Flemish Parliament, a design of farris.schöning, a collaboration of Italian architect Giuseppe Farris and Antwerp designer Stefan Schöning.
